

Have you heard about
Association for Molecular Pathology
v. Myriad Genetics, Inc?

A seminar with
Charles Vorndran, JD, PhD

Charles' practice focuses on all aspects of intellectual property with an emphasis in biotechnology and chemical technologies. He has extensive experience in cellular/molecular biology and has prosecuted patent applications directed to bionanotechnology small molecule therapies, genetics, proteins, oligonucleotides, anti-virals, antibody technology, screening assays, DNA/RNA technology, stem cells, tissue engineering, microarrays and peptide nucleic acid technology.

Come find out how this Supreme Court ruling on the patentability of genes and diagnostics and other new patent topics from the America Invents Act are important for your research

September 26, 2013

3:00 pm - 5:00 pm

Suddath Symposium Room

Institute for Bioengineering & Bioscience
